

SOLAR HEATING & COOLING PROGRAMME  
INTERNATIONAL ENERGY AGENCY

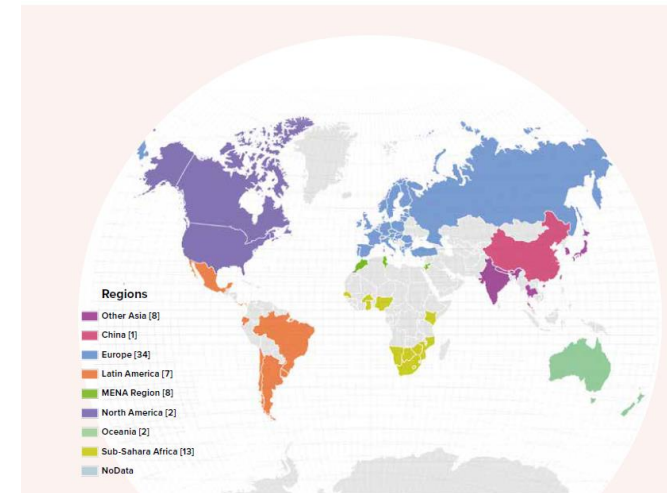

# Solar market trends in a nutshell

Monika Spörk-Dür  
AEE – Institute for Sustainable Technologies

# Solar Heat Worldwide Overview

- **Data from 73 countries**
- **Collector technologies covered**
  - Water collectors unglazed and glazed (ETC, FPC)
  - Air collectors
  - PVT Collectors
  - Photovoltaic generated heat (PVG)
- **Applications**
  - Small scale: DHW and space heating
  - Large-scale (>500 m<sup>2</sup>): district heating
  - Industrial applications
  - Air conditioning and cooling
- **2024: 544 GW<sub>th</sub> installed, 443 TWh energy yield and 153.5 million tons of CO<sub>2</sub> equivalent emissions reduction**
- **Employment and turnover 2023: 318,000 jobs, EUR 13.9 billion (US\$ 15.7 billion)**

# Global solar thermal capacity in operation and annual energy yields 2000-2024

Annually installed in operation and annual energy yields 2000-2024

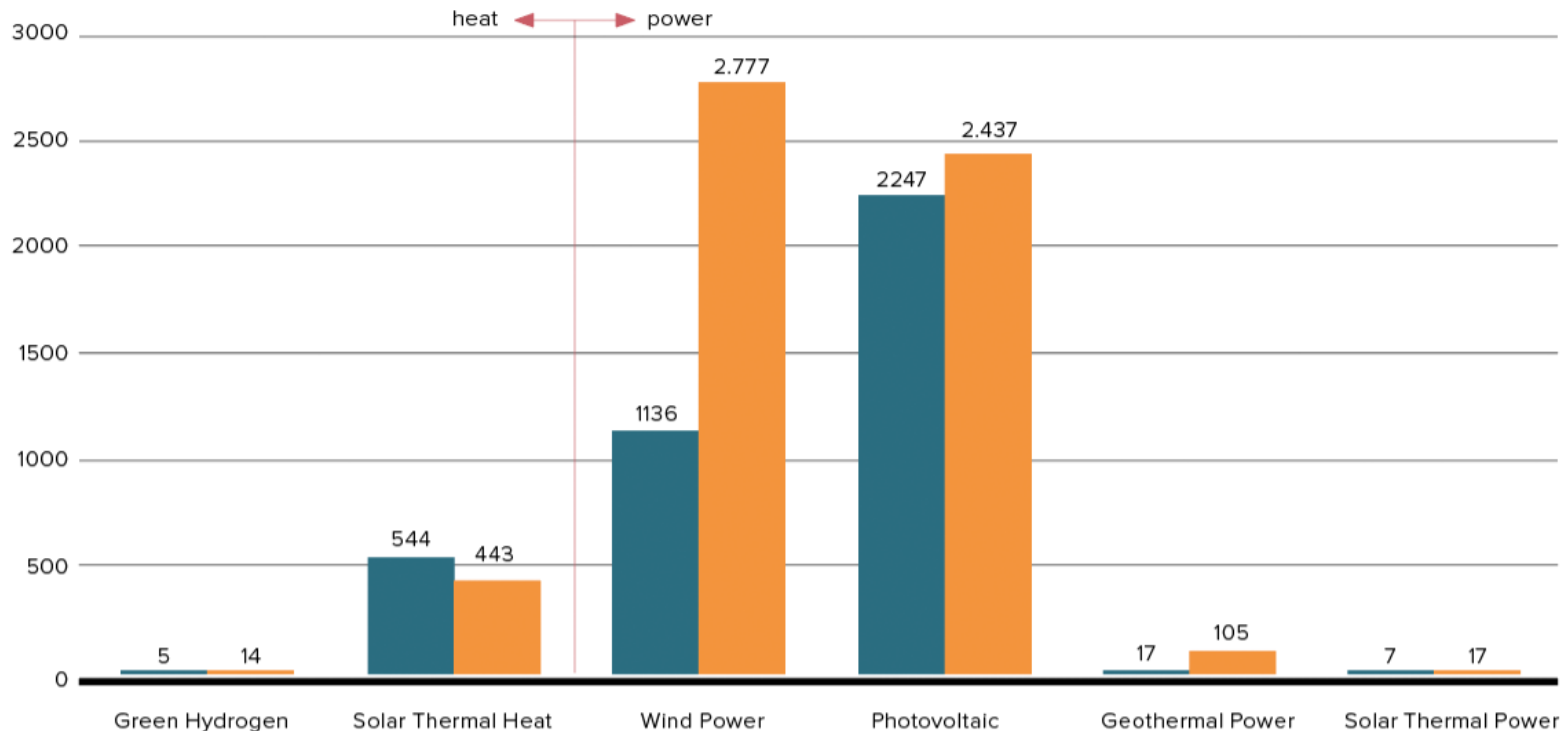

# Annually installed capacity 2000-2024

Annually installed capacity 2001-2024

# Capacities of renewable energy technologies

**Figure 5: Global capacity in operation [ $\text{GW}_{\text{e}}$ ], [ $\text{GW}_{\text{th}}$ ] 2024 and annual energy yields [ $\text{TWh}_{\text{e}}$ ], [ $\text{TWh}_{\text{th}}$ ]**

(Solar Thermal: AEE INTEC, Wind Power: Global Wind Energy Council

(GWEC), Photovoltaic: IEA Solar PVPS (<https://iea-pvps.org/snapshot-reports/snapshot-2024/>), Geothermal Power and Solar Thermal Power: Irena Renewable Energy Capacity Statistics 2023)

■ Total capacity in operation [ $\text{GW}_{\text{th}}$ ,  $\text{GW}_{\text{e}}$ ]  
 ■ Energy supplied [ $\text{TWh}$ ]

# Market Development 2000-2023

Annually installed capacity of glazed water collectors 2000 - 2023

# Market Development excl. China and Europe

**Annually installed capacity of glazed water collectors 2000 - 2023**  
RoW (excluding China and Europe)

# Countries with largest market growth in 2024

Countries with Largest Solar Thermal Market Growth in 2024

# Large-scale solar thermal heating systems

Solar heat costs  
range from  
**€20 to  
€50/MWh**

48,800 m<sup>2</sup> collector area for DH in Groningen, Netherlands commissioned in 2024

# Large-scale solar thermal heating systems

## Large-scale systems for district heating and for large residential, commercial and public buildings

Annual installed systems and cumulated area in operation

# Large-scale solar thermal heating systems

## Large-scale systems for solar district heating

Collector area, capacities installed and No. of systems by country (2024)

**1,315 systems in operation worldwide**

**106 systems with 120 MW<sub>th</sub> added in 2024**

## Main collector types

- Parabolic trough:  
75 systems with 482 MW<sub>th</sub>
- Flat plate collectors:  
331 systems with 196 MW<sub>th</sub>

## Main applications

- Mining
- Food and beverage
- Other processing industries

# Outlook 2025 and beyond

2025-04-02 09:20:00  
+8 86524 +50 91356

**Renewables supplied about 10% of global heat demand in 2023**

**Solar heating and cooling offers diverse technologies for decarbonizing buildings and industries**

**Small-scale systems for buildings in markets like Latin America, Asia, Africa**

**Large-scale systems for district heating and process heat in the pipeline**

**Solar cooling options could help reduce cooling related carbon emissions by 60% by 2050**

**Research and Development**

Bracht - 100% renewable district heating; 11,637 m<sup>2</sup> collector area, 26,600 m<sup>3</sup> seasonal pit storage, 75-80% solar fraction
